

About Lilly

At Lilly, everything we do starts with patients. We unite caring with discovery to make life better for people around the world. Headquartered in Indianapolis, Indiana, our global team of over 50,000 employees work with urgency and purpose to discover and deliver life-changing medicines, strengthen how health is understood and managed, and support the communities we serve. We bring our best to this work because people depend on it. If you're driven by purpose and determined to make a meaningful difference for patients, we invite you to bring your skill and your commitment to Lilly.

About Commercial at Lilly, Bengaluru

The medicines Lilly develops only reach patients if the commercial engine behind them works with precision. At Lilly in Bengaluru, the commercial function builds and powers that engine, designing the capabilities, generating the intelligence, and developing the strategies that Lilly's customer-facing teams around the world depend on to connect medicines to the people who need them. The work here is not local in scope. It shapes how Lilly operates commercially across geographies, business units, and markets globally.

Job Description – ML/AI Engineering Intern

The purpose of the ML/AI Engineering team within Commercial is to build and operate the infrastructure that takes machine learning and generative AI solutions from prototype to production at scale, partnering with data science, engineering, and business stakeholders to power Lilly's global commercial analytics engine.

Job Location

Bengaluru

Key Responsibilities

- Support development and testing of components within ML/AI pipelines, gaining exposure to production-grade software engineering practices such as Git-based version control, code review, and CI/CD
- Assist in deploying and monitoring ML/AI workloads (Docker, Kubernetes, Prefect) under the guidance of senior engineers, and help document how production systems are orchestrated
- Contribute to scoped tasks within generative AI/LLM application projects (e.g., Claude-based applications), including prompt drafting, testing, and evaluation support
- Gain foundational exposure to agentic AI concepts (e.g., LangGraph) and retrieval-augmented generation using vector databases such as Pinecone
- Support model monitoring activities — helping identify, document, and triage data drift, model drift, and performance issues under supervision
- Participate in stand-ups, sprint ceremonies, and technical design discussions as a learner/contributor, communicating progress and blockers clearly

Education Requirements

- Currently pursuing a Bachelor's/Master's degree in Computer Science, Computer Applications, Engineering, or a related quantitative discipline

What we look for

- Ability to learn quickly and stay curious in an ambiguous, fast-evolving technical environment (GenAI/MLOps)
- **Technical Skills**
 - **Foundational**
 - Working proficiency in Python
 - Basic familiarity with Git/GitHub
 - Experience in SQL (preferred)
 - Understanding of basic data structures and problem-solving through code
 - **MLOps & Deployment (exposure, not required)**
 - Any exposure to Docker or containerization concepts (preferred)
 - Any exposure to Kubernetes, Prefect, or similar orchestration/workflow tools (preferred)
 - Familiarity with the idea of CI/CD pipelines (preferred)
 - **Generative AI & LLMOps (exposure, not required)**
 - Any exposure to LLM APIs such as Claude or similar (preferred)
 - Coursework or personal projects involving prompt engineering, RAG, or agentic frameworks (e.g., LangGraph) (preferred)
 - Basic awareness of vector databases (e.g., Pinecone) and semantic search concepts (preferred)
 - **Cloud & Data (exposure, not required)**
 - Any exposure to AWS services (EC2, S3, Lambda, or similar) (preferred)
 - Familiarity with Databricks or similar data platforms (preferred)
 - Experience with data visualization tools such as Power BI (preferred)
- **Soft Skills**
 - Strong work ethic and personal motivation
 - Strong analytical mindset with good attention to detail and accuracy
 - Good presentation skills
 - Interpersonal and communication skills with ability to work across time zones
 - Ability to operate effectively in an international matrix environment
 - Strong team player who is dynamic and result-oriented
 - Prioritization skills and ability to manage multiple scoped tasks
 - High level of motivation and a strong desire to find creative solutions to challenging problems

At Lilly, caring is not only what we do for patients. It is how we work. We believe the people who dedicate themselves to making medicines better deserve an environment that makes their lives better too, one where they are supported, respected, and given the space to do their best work. This is not just a policy. It is who we are.

Lilly does not discriminate on the basis of age, race, color, religion, gender, sexual orientation, gender identity, gender expression, national origin, protected veteran status, disability or any other legally protected status.
